

Frontend developer roadmap

Rustam

**Here's a step-by-step
guide to getting started
with modern frontend
development in 2022.**

Save for later

STEP 1

HTML

Learn the basics, forms and validations. You should also focus on conventions & best practices.

STEP 2

CSS

Learn CSS basics, how to make layouts (float, grid, flexbox, etc), and responsive design.

STEP 3

JavaScript

Important topics to focus on are:
basic syntax, DOM manipulation,
Fetch API, ES6, etc.

STEP 4

Version Control

Learn how to track changes to your codebase/files over time to collaborate with other people.

STEP 5

Package Managers

Learn how to manage external code (dependencies) that your project needs to work correctly.

STEP 6

Framework/Library

Choose from the following options:
React, Vue.js, or Angular, and start
learning by building small projects.

STEP 7

Modern CSS

Learn about styled components, CSS modules, Styled JSX. Then, move on to Bootstrap/Bulma.
