

FRONTEND ROADMAP IN 180 DAYS

Month 1: HTML & CSS

Week 1-2: HTML

- Learn Basics:
 - Structure of an HTML document.
 - Common tags: headings, paragraphs, lists, links, images, tables.
 - Forms and form validation.
 - Semantic HTML.
- Resources:
 - MDN Web Docs
 - FreeCodeCamp HTML Course

Week 3-4: CSS

- Learn Basics:
 - CSS syntax and selectors.
 - Box model (margin, border, padding, content).
 - Flexbox and Grid layout.
 - Responsive design with media queries.
 - CSS positioning (static, relative, absolute, fixed, sticky).
 - CSS transitions and animations.
- Resources:
 - MDN Web Docs
 - FreeCodeCamp CSS Course

Month 2: JavaScript Basics

Week 5–6: JavaScript Basics

- Learn Basics:
 - Variables, data types, and operators.
 - Control structures (if, switch, loops).
 - Functions and scope.
 - Arrays and objects.
 - DOM manipulation and events.
- Resources:
 - MDN Web Docs
 - FreeCodeCamp JavaScript Course

Week 7–8: Advanced JavaScript

- Learn Advanced Concepts:
 - ES6+ features (let, const, arrow functions, template literals, destructuring).
 - Promises and async/await.
 - Fetch API for making HTTP requests.
 - Modules and import/export.
- Resources:
 - MDN Web Docs
 - JavaScript.info

Month 3: Version Control and Build Tools

Week 9–10: Git and GitHub

- Learn Basics:
 - Git installation and setup.
 - Basic commands (init, clone, commit, push, pull, branch, merge).
 - Working with GitHub repositories.
- Resources:
 - Git documentation
 - GitHub Learning Lab

Week 11–12: Build Tools

- Learn Basics:
 - Package managers (npm, yarn).
 - Task runners (npm scripts).
 - Module bundlers (Webpack).
 - CSS preprocessors (Sass).
- Resources:
 - Webpack documentation
 - Sass documentation

Month 4: ReactJS

Week 13-14: React Basics

- Learn Basics:
 - Setting up a React project with Create React App.
 - JSX syntax.
 - Functional components and props.
 - State and lifecycle methods.
 - Event handling.
- Resources:
 - React documentation
 - FreeCodeCamp React Course

Week 15-16: Advanced React

- Learn Advanced Concepts:
 - Hooks (useState, useEffect, useContext).
 - Context API.
 - React Router for navigation.
 - Form handling and validation.
 - State management with Redux.
- Resources:
 - React documentation
 - Redux documentation

Month 5: UI Frameworks and Advanced CSS

Week 17-18: UI Frameworks

- Learn Basics:
 - Bootstrap or Material-UI.
 - Integrating a UI framework into a React project.
 - Customizing components and themes.
- Resources:
 - Bootstrap documentation
 - Material-UI documentation

Week 19-20: Advanced CSS

- Learn Advanced Concepts:
 - CSS-in-JS (styled-components, Emotion).
 - CSS Grid for complex layouts.
 - Advanced animations with CSS and JavaScript.
- Resources:
 - CSS Tricks
 - MDN Web Docs

Month 6: Final Project and Deployment

Week 21–22: Final Project Planning and Design

- Plan Your Project:
 - Choose a project (e.g., a portfolio website, a blog, a small e-commerce site).
 - Design wireframes and mockups.
 - Set up a project repository on GitHub.

Week 23–24: Final Project Implementation

- Implement Your Project:
 - Build your project using React and other tools learned.
 - Ensure responsive design and accessibility.
 - Write clean, maintainable code and comments.

Week 25–26: Deployment and Optimization

- Deploy and Optimize:
 - Deploy your project using platforms like Netlify, Vercel, or GitHub Pages.
 - Optimize for performance (code splitting, lazy loading).
 - Add analytics and monitor performance.
- Resources:
 - Netlify documentation
 - Vercel documentation
